ALLCLOUD DATA PROTECTION

Protect critical systems by backing it up to the cloud.

All Lines Technology (ALT) can develop and deploy the best backup strategy to keep your organization protected and get your data to the cloud.

The 3-2-1 rule states that you need to keep three copies of your data, stored on two types of media, with one copy being off site. Securing backups off-site can be challenging due to limited bandwidth, exploding data volumes, and a lack of resources required to build or maintain a true off-site backup repository. With ALT Backup as a Service (BaaS), you can master the 3-2-1 rule without significant investment into a second site or increasing bandwidth.

*Customers must Veeam 9.5 or above for ALT BaaS
